# Data Management Plan Okeanos Explorer (EX1606): CAPSTONE Wake Island Unit PRIMNM

# **OER** Data Management Objectives

Standard Operating Procedures onboard the ship and throughout the ship's established data pipelines will be followed to ensure the data from this mission is organized, documented and archived within 30-90 days of cruise end.

### 12-Jul-16

Page 1

# 1. General Description of Data to be Managed

# 1.1 Name and Purpose of the Data Collection Project

Okeanos Explorer (EX1606): CAPSTONE Wake Island Unit PRIMNM

### 1.2 Summary description of the data to be collected.

Operations will use the ship's deep water mapping systems (Kongsberg EM302 multibeam sonar, EK60 splitbeam fisheries sonars, ADCPs, and Knudsen 3260 chirp sub-bottom profiler sonar), NOAA's two-body 6000 m remotely operated vehicle (ROVs Deep Discoverer and Seirios), CTD rosette, and the ship's high-bandwidth satellite connection for real-time ship to shore communications. Daytime ROV dives are planned most days from July 28 –August 16th a few dedicated mapping transit days are also expected. ROV dives will include highresolution visual surveys and limited rock and biologic specimen sampling. Mapping operations will be conducted overnight and when the ROV is on deck. CTD casts may be requested during the cruise to collect more environmental information at sites of interest.

# 1.3 Keywords or phrases that could be used to enable users to find the data.

expedition, exploration, explorer, marine education, noaa, ocean, ocean discovery, ocean education, ocean exploration, ocean exploration and research, ocean literacy, ocean research, OER, science, scientific mission, scientific research, sea, stewardship, systematic exploration, technology, transformational research, undersea, underwater, Davisville, mapping survey, multibeam, multibeam backscatter, multibeam sonar, multi-beam sonar, noaa fleet, okeanos, okeanos explorer, R337, Rhode Island, scientific computing system, SCS, single beam sonar, singlebeam sonar, single-beam sonar, sub-bottom profile, water column backscatter, oceans, CAPSTONE, Wake Island, Prime Crust Zone, Pacific Seamounts, deep sea coral, bottom fish habitats, PRIMNM, Pacific Remote Islands Marine National Monument, Guam, Kwajalein, vulnerable marine habitats, seamounts, monument management, WWII submerged cultural heritage, World War II, benthic habitats, archaeological, archaeology, conservation, conserve, crm, cultural resource management, historic, marine archaeology, maritime, maritime archaeology, nautical, nautical archaeology, preserve, protect, protection, submerged cultural heritage, submerged cultural resource, uch, underwater cultural heritage

# 1.4 If this mission is part of a series of missions, what is the series name?

**Okeanos ROV Cruises** 

# 1.5 Planned or actual temporal coverage of the data.

Dates: 7/27/2016 to 8/19/2016

1.6 Planned or actual geographic coverage of the data.

Okeanos Explorer (EX1606): CAPSTONE Wake Island Unit PRIMNM

#### 12-Jul-16

Latitude Boundaries:	7.5	to	23
Longitude Boundaries:	142	to	171

#### 1.7 What data types will you be creating or capturing and submitting for archive?

Cruise Plan, Cruise Summary, Data Management Plan, Highlight Images, Quick Look Report, CTD (raw), CTD (processed), Dive Summaries, EK60 Singlebeam Data, Expedition Cruise Report, Highlight Video, Images, Mapping Summary, Multibeam (image), Multibeam (processed), Multibeam (product), Multibeam (raw), NetCDF, Raw Video (digital), Salinity data, Sample Analysis Reports, SCS Output (compressed), SCS Output (native), Selected Raw Video, Temperature data, Water Column Backscatter, XBT (raw)

#### 1.8 What platforms will be employed during this mission?

NOAA Ship Okeanos Explorer, Deep Discoverer ROV, SEIRIOS Camera Sled

2. Point of Cont	act for this Data Producing Project	
Overall POC:	Brian Kennedy	
Title:	Expedition Coordinator	
Affiliation/Dept:	Global Foundation for Ocean Exploration	
E-Mail:	brian.kennedy@noaa.gov	
Phone:	706-540-2664	
3. Point of Contact for Managing the Data		
Data POC Name:	Andy O'Brien, Joshua Carlson, Christopher Kelley, Susan Gottfried	
Title:	Onboard Operational Data Management, Shoreside Data Management, Sampling Operations Data Management, Data Stewardship and Archive	
E-Mail:	andrew.parson.obrien@gmail.com, joshocar@gmail.com, ckelley@hawaii.edu,	

# 4. Resources

4.1 Have resources for management of these data been identified?

susan.gottfried@noaa.gov

True

4.2 Approximate percentage of the budget devoted to data management. (specify % or "unknown")

unknown

# 5. Data Lineage and Quality

# 5.1 What is the processing workflow from collection to public release?

SCS data shall be delivered in its native format as well as an archive-ready, documented, and compressed NetCDF3 format to NCEI-MD; multibeam data and metadata will be compressed and delivered in a bagit format to NCEI-CO; video data shall be documented and archived in the NOAA CLASS system and the oceanographic archive; specimens shall be processed onboard the Okeanos Explorer in the WetLab and then delivered with documentation to repositories based upon their specimen type (Biological - Smithsonian, Geological - Oregon State University Marine Geological Laboratory, Genetic - Ocean Genomic Legacy)

#### 5.2 What quality control procedures will be employed?

Quality control procedures for the data from the Kongsberg EM302 is handled at UNH CCOM/JHC. Raw (level-0) bathymetry files are cleaned/edited into new data files (level-1) and converted to a variety of products (level-2). Data from sensors monitored through the SCS are archived in their native format and are not quality controlled. Data from CTD casts and XBT firings are archived in their native format. CTDs are post-processed by the data management team as a quality control measure and customized CTD profiles are generated for display on the Okeanos Atlas (explore.noaa.gov/okeanosatlas).

# 6. Data Documentation

#### 6.1 Does the metadata comply with the Data Documentation Directive?

True

True

#### 6.1.1 If metadata are non-existent or non-compliant, please explain:

not applicable

#### 6.2 Where will the metadata be hosted?

Organization: An ISO format collection-level metadata record will be generated during pre-cruise planning and published in an OER catalog and Web Accessible Folder (WAF) hosted at NCEI-MS for public discovery and access. The record will be harvested by data.gov.

URL: http://www.ncddc.noaa.gov/oer-waf/ISO/Resolved/2016/

Meta Std: ISO 19115-2 Geographic Information with Extensions for Imagery and Gridded Data will be the metadata standard employed; a NetCDF3 standard for oceanographic data will be employed for the SCS data; the Library of Congress standard, MAchine Readable Catalog (MARC), will be employed for NOAA Central Library records.

#### 6.3 Process for producing and maintaining metadata:

Metadata will be generated via xml editors or metadata generation tools.

# 7. Data Access

#### 7.1 Do the data comply with the Data Access Directive?

#### 7.1.1 If the data will not be available to the public, or with limitations, provide a valid reason.

Not Applicable

#### **7.1.2** If there are limitations, describe how data are protected from unauthorized access.

Account access to mission systems are maintained and controlled by the Program. Data access prior to public accessibility is documented through the use of Data Request forms and standard operating procedures.

#### 7.2 Name and URL of organization or facility providing data access.

- Org: National Centers for Environmental Information
- URL: http://explore.noaa.gov/digitalatlas

#### 7.3 Approximate delay between data collection and dissemination. By what authority?

Hold Time: not applicable

Authority: not applicable

#### 7.4 Prepare a Data Access Statement

#### 12-Jul-16

No data access constraints, unless data are protected under the National Historic Preservation Act of 1966.

### 8. Data Preservation and Protection

# 8.1 Actual or planned long-term data archive location:

Data from this mission will be preserved and stewarded through the NOAA National Centers for Environmental Information. Refer to the Okeanos Explorer FY16 Data Management Plan at NOAA's EDMC DMP Repository (EX\_FY16\_DMP\_Final.pdf) for detailed descriptions of the processes, procedures, and partners involved in this collaborative effort.

# 8.2 If no archive planned, why?

not applicable

# 8.3 If any delay between data collection and submission to an archive facility, please explain.

30-90 days

#### 8.4 How will data be protected from accidental or malicious modification or deletion?

Data management standard operating procedures minimizing accidental or malicious modification or deletion are in place aboard the Okeanos Explorer and will be enforced.

#### 8.5 Prepare a Data Use Statement

Data use shall be credited to NOAA Office of Ocean Exploration and Research.
