

# Data Management Plan

## Okeanos Explorer (EX1802): Emerging Technology Demonstration and Mapping

**Ocean Exploration  
and Research**

### *OER Data Management Objectives*

*Data collected by Emerging Technology projects will not be archived. All other data will follow normal data management procedures.*

08-Mar-18

Page 1

## **1. General Description of Data to be Managed**

### **1.1 Name and Purpose of the Data Collection Project**

Okeanos Explorer (EX1802): Emerging Technology Demonstration and Mapping

### **1.2 Summary description of the data to be collected.**

Operations will include the use of the ship's deep water mapping systems (Kongsberg EM302 multibeam sonar, EK60 split-beam fisheries sonars, Knudsen 3260 chirp sub-bottom profiler sonar, and Teledyne Acoustic Doppler Current Profiler), and XBT casts in support of multibeam sonar mapping operations, and the ship's high-bandwidth satellite connection for continuous real-time ship-to-shore communications. Operations are planned in the northern Gulf of Mexico. Emerging technologies components of this cruise will be in partnership with the Cooperative Institute for Ocean Exploration Research and Technology (CIOERT) at Florida Atlantic University and the Naval Undersea Warfare Center (NUWC) Newport RI.

### **1.3 Keywords or phrases that could be used to enable users to find the data.**

expedition, exploration, explorer, marine education, noaa, ocean, ocean discovery, ocean education, ocean exploration, ocean exploration and research, ocean literacy, ocean research, OER, science, scientific mission, scientific research, sea, stewardship, systematic exploration, technology, transformational research, undersea, underwater, Davisville, mapping survey, multibeam, multibeam backscatter, multibeam sonar, multi-beam sonar, noaa fleet, okeanos, okeanos explorer, R337, Rhode Island, scientific computing system, SCS, single beam sonar, singlebeam sonar, single-beam sonar, sub-bottom profile, water column backscatter, oceans, Gulf of Mexico, Pascagoula, emerging technology, midwater profiler, instrumented tow cable

### **1.4 If this mission is part of a series of missions, what is the series name?**

Okeanos Mapping Cruises

### **1.5 Planned or actual temporal coverage of the data.**

Dates: 3/23/2018 to 4/5/2018

### **1.6 Planned or actual geographic coverage of the data.**

Latitude Boundaries: 24.53 to 30.32

Longitude Boundaries: -90.63 to -84.07

### **1.7 What data types will you be creating or capturing and submitting for archive?**

Cruise Plan, Cruise Summary, Data Management Plan, Highlight Images, Quick Look Report, Bottom Backscatter, CTD (processed), CTD (raw), EK60 Singlebeam Data, EK80 Echosounder, Floating Point GeoTIF, GSF, HDCS, Mapping Summary, Multibeam (image), Multibeam (processed), Multibeam (product), Multibeam (raw), SCS

Okeanos Explorer (EX1802): Emerging Technology Demonstration and Mapping

Output (compressed), SCS Output (native), Sub-Bottom Profile data, Water Column Backscatter, XBT (raw)

### 1.8 What platforms will be employed during this mission?

NOAA Ship Okeanos Explorer

## 2. Point of Contact for this Data Producing Project

Overall POC: Elizabeth Lobecker, Multibeam Mapping Expert, Contractor (ERT, Inc.), NOAA Office of Ocean Exploration and Research, elizabeth.lobecker@noaa.gov

Title: Co-Expedition Coordinator and Mapping Lead

Affiliation/Dept: Contractor (ERT, Inc.), NOAA Office of Ocean Exploration and Research

E-Mail: elizabeth.lobecker@noaa.gov

Phone: 603-862-1475

## 3. Point of Contact for Managing the Data

Data POC Name: Susan Gottfried

Title: OER Data Management Coordinator

E-Mail: susan.gottfried@noaa.gov

## 4. Resources

4.1 Have resources for management of these data been identified? True

4.2 Approximate percentage of the budget devoted to data management. (specify % or "unknown")  
unknown

## 5. Data Lineage and Quality

### 5.1 What is the processing workflow from collection to public release?

SCS data shall be delivered in its native format as well as an archive-ready, documented, and compressed NetCDF3 format to NCEI-MD; multibeam data and metadata will be compressed and delivered in a bagit format to NCEI-CO

### 5.2 What quality control procedures will be employed?

Quality control procedures for the data from the Kongsberg EM302 is handled at UNH CCOM/JHC. Raw (level-0) bathymetry files are cleaned/edited into new data files (level-1) and converted to a variety of products (level-2). Data from sensors monitored through the SCS are archived in their native format and are not quality controlled. Data from CTD casts and XBT firings are archived in their native format. CTDs are post-processed by the data management team as a quality control measure and customized CTD profiles are generated for display on the Okeanos Atlas ([explore.noaa.gov/okeanosatlas](http://explore.noaa.gov/okeanosatlas)).

## 6. Data Documentation

6.1 Does the metadata comply with the Data Documentation Directive? True

### 6.1.1 If metadata are non-existent or non-compliant, please explain:

not applicable

**6.2 Where will the metadata be hosted?**

Organization: An ISO format collection-level metadata record will be generated during pre-cruise planning and published in an OER catalog and Web Accessible Folder (WAF) hosted at NCEI-MS for public discovery and access. The record will be harvested by data.gov.

URL: <https://www.ncddc.noaa.gov/rdn/oer-waf/ISO/Resolved/2018/>

Meta Std: ISO 19115-2 Geographic Information with Extensions for Imagery and Gridded Data will be the metadata standard employed; a NetCDF3 standard for oceanographic data will be employed for the SCS data; the Library of Congress standard, MACHine Readable Catalog (MARC), will be employed for NOAA Central Library records.

**6.3 Process for producing and maintaining metadata:**

Metadata will be generated via xml editors or metadata generation tools.

**7. Data Access****7.1 Do the data comply with the Data Access Directive?**

True

**7.1.1 If the data will not be available to the public, or with limitations, provide a valid reason.**

Not Applicable

**7.1.2 If there are limitations, describe how data are protected from unauthorized access.**

Account access to mission systems are maintained and controlled by the Program. Data access prior to public accessibility is documented through the use of Data Request forms and standard operating procedures.

**7.2 Name and URL of organization or facility providing data access.**

Org: NOAA National Centers for Environmental Information

URL: <https://data.noaa.gov/datasetsearch/>

**7.3 Approximate delay between data collection and dissemination. By what authority?**

Hold Time: no

Authority: not applicable

**7.4 Prepare a Data Access Statement**

No data access constraints, unless data are protected under the National Historic Preservation Act of 1966.

**8. Data Preservation and Protection****8.1 Actual or planned long-term data archive location:**

Data from this mission will be preserved and stewarded through the NOAA National Centers for Environmental Information. Refer to the Okeanos Explorer FY18 Data Management Plan at NOAA's EDMC DMP Repository (EX\_FY16\_DMP\_Final.pdf) for detailed descriptions of the processes, procedures, and partners involved in this collaborative effort.

**8.2 If no archive planned, why?****8.3 If any delay between data collection and submission to an archive facility, please explain.**

60-90 days

Okeanos Explorer (EX1802): Emerging Technology Demonstration and Mapping

**8.4 How will data be protected from accidental or malicious modification or deletion?**

Data management standard operating procedures minimizing accidental or malicious modification or deletion are in place aboard the Okeanos Explorer and will be enforced.

**8.5 Prepare a Data Use Statement**

Data use shall be credited to NOAA Office of Ocean Exploration and Research.
