

## OER Data Management Team Mission Report EX1604 (Mar 23 – Apr 13, 2016)

The EX1604 [Data Management Plan](#) described the following objectives, which were mostly met.

- *There will be no onboard data manager for this mission*
- *this mission will rely on the onboard data managers for EX1603 to prepare the data environment for this mission prior to disembarking*
- *the data management stewardship team will rely on automated routines and standard operating procedures to ensure that data from this mission will be successfully received for post-processing.*

Brendan, Andy, and Josh reported good data quality and successful transfer of files during the mission. There was a problem with the shoreside SRS that was resolved.

The [mission ISO metadata record](#) has been updated to reflect the cruise has taken place.

Data Throughput

Project Instructions Received	Data Management Plan Delivered	ISO Collection Level Metadata Published	Cruise End	Data Received	Final Data Archive Complete	Cruise End to Archive
2/4/2016	3/3/2016	5/23/2016	4/13/2016	5/20/2016	6/14/16	63 days
